# CITIZEN AQUALAND 40<sup>TH</sup> ANNIVERSARY

## THE PERFORMERS

### **Gaetano Tizzano** (Oceanus)

Actor, performer, and freediver. The face of Italy's Ministry of Culture campaign "A teatro si respira la vita", he embodies artistic projects where breath meets water.

### **Emanuele Marchetti** (Chronos)

A multifaceted artist: actor, dancer, acrobat. He has graced international stages and brought freediving into the realm of opera.

### **Diletta della Martira, Elena Griggio, Giulia Silvestri** (Oceanids)

Dancers, actresses, and freedivers. Poetic voices of the water, blending classical dance with visual experimentation. They have performed for major brands and theatres, offering their bodies to the depths.

### **Roberta Bellesia, Gabriela Felicioni, Paola Zanaga** (Sirens)

Professional mermaids, freediving champions, and performers in aquatic shows and campaigns. Water women who enchant with a single gesture and breath.

### **Giada Finco, Lucrezia De Mari, Beatrice Lazzaro, Giorgia Gazzato** (Horae)

Elite synchronized swimmers and former national athletes. Under the direction of former Olympian Joey Paccagnella, they bring the order of time to the stage with grace and precision.

## WHEN TIME MEETS DEPTH

In the heart of the world's deepest thermal water pool, a unique performance comes to life — where myth and innovation merge to celebrate 40 years of the first dive watch with a depth gauge: the **Citizen Aqualand**.

From the silence of the abyss rises **Oceanus**, Titan of the primordial waters. Drawn by the call of the **Sirens, Chronos** — Time itself — descends into the submerged realm, enticed by their songs and visions. Alongside them dance the **Oceanids**, bringers of gifts, and the **Horae**, spirits of cyclical time and natural harmony.

Floating lights, ascending bubbles, and slow, symbolic movements portray the encounter between two dimensions: that of time and that of depth. The finale culminates in a luminous sphere that symbolically merges with the watch — marking the moment when innovation meets myth.

An immersive spectacle, suspended between art, freediving, and ingenuity — a tribute to a technical and poetic icon of the underwater world.
